## Entreprise Nationale de Services aux Puits (ENSP)

**ENSP leading Algerian Oil industries services company covers a wide range of services in the drilling and development of oil-producing fields.**

There are about thirty activities, numerous and diverse facilities, such as:

- Service Snubbing, Services Wire line & Well testing, Service environment protection, Mud Logging, interventions on oil Wells, surface facility cleaning and maintenance, Measurement and sampling operations

The production unit is mobile. It is moved daily to the oil wells and works under high pressure 700 bars and high temperature ambient 55°C, allowable temperature 90°C. It is under constant difficult environment and requires sustained maintenance.

Development of the technical specifications, requirements and feasibility study on the choice of materials by our engineers while respecting the environment and working conditions on site.

- Tailor-made manufacturing in our basque Country workshops of 08 High Hot Water Pressure Mobile Pump 10,000 PSI Cleaning For continuous work in the clean-up of oil equipment located at refineries in northern and southern Algeria (Sahara) and oil wells stations

Equipment to be operational for cleaning in an Explosion Proof area under severe working.

Delivery of platform IVECO trucks with assembly of a ridelle tray with false frame welded mechanical steel without wheel housing on which we have integrated Hot Water Motor Pump Groups, Pratissoli High Pressure Pump 700 Bars 28L/MIN, Lombardini 4 Cylindres engine, two boilers, control panel, hose reel, GUN complete with P15 handle with stop and start damping system on the platform.

Equipment supplied with a manufacturing information folder and spare parts for 2 years.

Completion, several custom tests and training in the factory in France for users, on the equipment being manufactured and once the equipment was ready to be shipped.

- Commissioning and testing of on-site units by our team of local engineers
- On site continuous training.

FRANCARE ensures maintenance of the equipment through Express interventions on all customer sites in Algeria and delivers the necessary spare parts for 2 years.
